ABOUT ME

I am a proactive and motivated Computer Science undergraduate with a strong interest in software engineering. I am eager to apply my academic knowledge and problem-solving skills in a real-world environment through an internship opportunity. Known for my collaborative mindset and positive attitude, I enjoy working in team-oriented settings and contributing to shared goals. I am passionate about continuous learning and committed to growing both personally and professionally while delivering high-quality work.

EDUCATION

University of Colombo School of Computing

May-2022 - Present

B.Sc.in Computer Science

(will be completing by May 2026)

Current GPA – 3.20/4.00

Vishvoda College, Kurunegala

GCE Advanced Level | 2021

Combined Maths – A Chemistry – B Physics – B

Z-Score – 1.6422

GCE Ordinary Level | 2018

6A's & 3B's

SKILLS

Programming Languages

C | C++ | Scala | PHP | Python | JavaScript | Java | R | Octave

Web Development

React | Node.js(Express) | SpringBoot | HTML | CSS

Databases

Mysql | MongoDB

Other Technologies

Git | Linux

PROJECTS

Uniquet [↗](#)

Jul-2024 – Apr -2025

UniQuest is a web application designed to help university students discover part-time jobs, internships, and industry opportunities. It connects students with companies and enables profile management, job applications, communication, and feedback — all in one platform. The system supports role-based access for students, companies, admins, and a verification team.

Contribution: Frontend and backend development of the web application.

HTML | CSS | JavaScript | PHP | MySQL

ArtAura [↗](#)

Jun-2025 – Present

ArtAura is a full-featured digital platform designed to connect artists, buyers, shop owners, moderators, and admins in a unified art ecosystem. It enables portfolio showcasing, artwork sales, exhibition management, and a dedicated marketplace for art supplies. The platform fosters collaboration and streamlines commerce within the art community.

Contribution: Developed both frontend and backend for the shop module, including product listings, order management, and sales analytics.

React | Java(Spring Boot) | Tailwind CSS | MySQL

Calliera [↗](#)

Jun-2025 – Jul-2025

Calliera is a full-stack social app featuring real-time chat, video calling, friend management, onboarding flow, and theme customization. It's built to deliver secure, interactive, and personalized user experiences with a scalable backend architecture.

Contribution: Designed and developed the full stack of the application, including real-time chat, video calling, authentication, and dynamic UI features.

React | Tailwind CSS | Node.js | Express | MongoDB | TanStack Query
